Evergreen Transplants for Lining Out

Our transplants will please you. They are growing on gravelly soil with plenty of space for development. This assures both a good top and root system. Part are from beds under irrigation. The majority, however, are from field rows.

Give us a trial order and let this stock speak for itself.

T-Once Transplanted—TT-Twice, etc.

Mugho Pine

Pine Mugho (Montana Mughus) These Mugho Pine are the desirable slow growing compact type with an excellent root system having been transplanted 3 or more times. These have also been sheared. We feel justified in naming ourselves "Headquarters for Mugho Pine."

Note: Winter color richness and unusual resistance to abuse and red spider places Mugho Pine far above Globe Arbor Vitae, etc. Why not use them more in your plantings and have satisfied customers?
